INTRODUCTION

The proposed Budget comprises of different presentations of Financial Summaries with its corresponding Fund Analysis, Revenue and Income Sources of Financing and the Detailed Expenditure Programs accordingly proportioned to each division/section under a specific department. Supporting this General Fund Budget are the respective departments' purposes and objectives, upcoming challenges and opportunities, key accomplishments and the performance measures of its operating divisions. It also integrates the Municipal Development Plan converted into an expenditure program by proposing only those projects which have been found and ranked as the top priority projects under the Municipal Annual Investment Plan. In addition, departments categorically apportioned their respective allocations into each type of expenditure, e.g. personal services: maintenance and operating expenses, capital outlays and special purpose appropriations of locally funded projects – a clear indication of local governance at its fullest and the desire for a decisive and a responsive delivery of public service.

It has been known fact, a proposed budget will accordingly respond to any established necessity in response to vital tangible changes brought about by the uncontrollable transformation of the municipality through the years.
